# EXTREMIT-EASE
COMPRESSION GARMENT

MEASUREMENT/FITTING GUIDE

Patient Name: _____   Date: _____

FITTING TIPS

- If the calf measurement is one size larger than the ankle on the fitting chart, the size should be based on the measurement of the calf.
- If the ankle measurement is one size larger than the calf on the fitting chart, the size should be based on the measurement of the ankle.
- If the difference between the calf and the ankle is more than one size in either direction, the garment should not be used and a custom prescribed compression wear should be utilized.
- If both the ankle and calf measurements fall at the mid-point between sizes, select the smaller size to avoid quickly sizing out of the garment. As fluid is dispersed, the smaller size will allow for longer use.

TIBIAL TUBEROSITY - *Bony "Bump" below knee*

CALF MEASUREMENT - *Taken at widest part of the calf muscle*
RIGHT LEG | LEFT LEG

LENGTH MEASUREMENT - *Taken from floor to Tibial Tuberosity*
RIGHT LEG | LEFT LEG

ANKLE MEASUREMENT - *Taken just above the ankle*
RIGHT LEG | LEFT LEG
